A Perfect Admission Plan

College admission is all about finding a college/ university that fits your future. As an applicant, you look for an environment where you can thrive academically and personally. Where you get an opportunity to make great additions to a unique campus community. There are multiple parts of a completed admissions application, and each college requires something slightly different.

Thing slightly different

It takes hard work to guarantee your college application stands out. Make it rise to the top of the pile you need to be familiar with the application process and getting organized. A lot of moving parts go into applying to college – tests, essays, recommendation letters, transcripts – and each element has a deadline attached. As an applicant you need to submit all the required documents on time. It's better to make a careful note of deadlines for each college you are applying for so that you don't miss them!

How Many Colleges to Apply To?

There are a ton of choices out there but applying to too many colleges is a common mistake. Submitting the application for 5-8 colleges is suggested. Include a variety of institutes in your list like **Dream colleges**, these are colleges you know will be a challenge to get into. **Target colleges** are colleges those you need to target considering all the key factors. **Match colleges** are colleges you know match perfectly your interests & budget. **Safety colleges** are colleges you know will surely accept you. **Possible colleges** are those you have good chance of getting into, and more.

The College Application Checklist

Having a clear list of steps to follow helps you meet deadlines. The following list covers some of the basics you must keep in mind to make the college application process smoother.

- Research and Self-Reflection
- Complete Your Application
- Choose Where to Apply
- Applying for Financial Aid
- Take Required Standardized Tests
- Choose Where to Attend
- Plan When to Apply

FIVE POINTERS FOR COLLEGE APPLICANTS TO STAND OUT

Build on Your Academic Strengths

Colleges are looking for students who have not only done well but who have also challenged themselves, as they are more likely to succeed in college-level courses. The key is to plan ahead and start in eighth or ninth grade to build a foundation that will open doors to advanced coursework later on.

For instance, you can also opt for online courses to strengthen your profile. Online courses in a similar domain as your area of interest will help you gain some insight into the field you would wish to pursue to add credibility to your claim for having an interest in that specific area of study. It will give your profile a major boost

Get a Hand on Entrance Tests

Always remember to check the entry requirements for your course before taking up any entrance test. To get the journey going, you should take a language assessment test and an admissions test before applying. There are many standard questions you may ask like which exams do I need to take to study abroad? There is no single answer to that question, as it depends on the factors like: The subject you want to study (law, business, medicine...), the level of the course (foundation, undergraduate, postgraduate...), the country of your choice, and more.

Think Outside the Extracurriculars

No matter what your interests are, find ways to use them to contribute to your school or local community. Colleges look at extracurriculars in the context of a student's environment.

Extracurricular activities show colleges a wide range of your aspects and characteristics that form a positive impression, such as being willing to learn new skills or work with others as a team. Your extracurricular activities on the college application provide colleges with information on your interests outside of the field, which shows that you have a well-rounded profile.

Work on Recommendations Carefully

Always give great consideration to people you ask to write recommendations. While letters of recommendation are just one part of the application, they do play an important role in the college admissions process. These letters provide admission representatives with valuable information that's not necessarily obvious from your college application alone. Letters of recommendation stand as a testament to your unique qualities, character, tenacity, academic successes, and personal achievements.

Show It Up to the Extent

Visiting the campus shows the admissions office that you'd be likely to attend if accepted. Showing up is still a great way to reveal what colleges refer to as "demonstrated interest," Making a trip to campus isn't the only way to let your interest be known, especially in the digital age which includes opening a college's emails or clicking on a link in a particular message, participating in a webinar or Facebook Live event, and more.

This is the perfect college admission plan and the ways to get you into your desired college.

INTERNATIONAL MODEL UNITED NATIONS 2022

International Model United Nations (IMUN) brings youth together from around the world to learn and share ideas from a diverse set of experiences and backgrounds where the Executive Board, International Press and International Delegates consolidate to learn about diplomacy, international relations, and the United Nations.
