

Learning Standard Frameworks

Keeping with the tradition of empowering the staff through the in-house Faculty Development Programme, a session on 'Learning Standards Framework' was conducted on 25th March by the Senior School Coordinator, Ms Sunita Verma. The objective of this session was to unanimously decide on the need for framing the 'Learning Standards' for classes VI-IX for each subject. The fruitful discussion resulted in the agreement on the framing learning standards for every level and subject. They also believed that the same should act as a scaffold in content transactions in the classroom with the aspiration that each child of the respective class attains the same. Thereafter, the members of each department came together to design the 'Learning Standards' for classes VI-IX in their subjects and shared them with the entire team. This framework is unique as it meets the present needs of each child with gradual progression.
